[Applicant Materials for Consideration](#)

DETAILS

Location:

2301 McFarland Road

Applicant / Agent (as applicable):

Sawgrass Consulting, LLC

Property Owner:

D. R. Horton, Inc.

Current Zoning:

R-1, Single-Family Residential Suburban District

Future Land Use:

Low Density Residential

Case Numbers:

6612

Unified Development Code Requirement:

- The Unified Development Code (UDC) limits new dwellings in an R-1, Single-Family Residential Suburban District to 35% site coverage.

Board Consideration:

- Site Coverage Variance to allow 45% site coverage for new dwellings in an R-1, Single-Family Residential Suburban District.

BOARD OF ADJUSTMENT VICINITY MAP - EXISTING AERIAL

The site is surrounded by residential units. Commercial units lie southwest of the site.

APPLICATION NUMBER <u> 6612 </u> DATE <u> September 9, 2024 </u>	 NTS
APPLICANT <u> Sawgrass Consulting, LLC </u>	
REQUEST <u> Site Coverage Variance </u>	

SITE HISTORY

The site was the subject of a two-lot subdivision, CYN-CLIF-SCO, Schambeau, Nichols Division, approved by the Mobile County Commission in July 2022.

Lot 1 of that subdivision was subsequently approved as Anglebrook Subdivision by the County Commission.

The area of the proposed subdivision was annexed into the City of Mobile in July 2023 and was subsequently assigned its current R-1, Single-Family Residential Suburban District zoning classification. Construction of streets within the proposed subdivision was begun, but as the site is now within the City, the Final Plat must be approved by the Planning Commission according to the City's Subdivision Regulations. The Subdivision and an associated Sidewalk Waiver are scheduled to be heard at the September 19 Planning Commission meeting. In conjunction, Anglebrook Subdivision, Phase 2 is also proposed to be heard at that meeting along with Rezoning of a portion of that subdivision from R-1, Single-Family Residential Suburban District, to R-3, Multi-Family Residential Suburban District.

The site has never been before the Board of Zoning Adjustment.

STAFF COMMENTS

Engineering Comments:

If the variance gets approved and there is a change in the amount of impervious area in the proposed project, the Engineer of Record must submit revised drainage calculations and drawings to permit ENG-128287-2024 for approval.

Traffic Engineering Comments:

No traffic impacts anticipated by this variance request.

Urban Forestry Comments:

Property to be developed in compliance with state and local laws that pertain to tree preservation and protection on both city and private properties [Act 929 of the 1961 Regular Session of the Alabama Legislature (Acts 1961, p. 1487), as amended, and City Code Chapters 57 and 65]. Private removal of trees in the right-of-way will require approval of the Mobile Tree Commission. Removal of heritage trees from undeveloped residential sites, developed residential sites in historic districts, and all commercial sites will require a tree removal permit.

Fire Department Comments:

All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2021 International Fire Code). Fire apparatus access is required to be within 150' of all non-sprinklered commercial buildings and within 300' of all sprinklered commercial buildings. Fire water supply for all commercial buildings will be required to meet the guidance of Appendices B and C of the 2021 International Fire Code. The minimum requirement for fire hydrants is to be within 400' of non-sprinkled commercial buildings, within 600' of sprinkled commercial buildings, and within 100' of fire department connections (FDC) for both standpipes and sprinkler systems.

Planning Comments:

The applicant is requesting a Site Coverage Variance to allow 45% site coverage for new dwellings in an R-1, Single-Family Residential Suburban District; the Unified Development Code (UDC) limits new dwellings in an R-1, Single-Family Residential Suburban District to 35% site coverage.

A detailed description of the proposed Site Coverage Variance request is available via the link on Page 1 of this report.

The proposed Site Coverage Variance request pertains to Lots 1 through 107 of the proposed 108-lot Anglebrook Subdivision which is under development. Most of those lots are to be a minimum of 8,060 square feet, with the largest being 19,714 square-feet along a curved street. Lot 108 is proposed to be further subdivided into 48 lots and rezoned from R-1 to R-3 to allow a townhome development in Phase 2 of the subdivision.

The standard front and side street side yard setbacks of 25 feet would apply, as well as the standard 5-foot side yard and 8-foot rear yard setbacks, except where greater because of easements. The applicant states that the project was originally approved and permitted by Mobile County, but midway through road construction, the site was annexed into the City of Mobile. The applicant states that the increased site coverage allowance will accommodate the largest proposed home plan on the smallest proposed lot.

VARIANCE CONSIDERATIONS

Standards of Review:

Variances are not intended to be granted frequently. The applicant must clearly show the Board that the request is due to very unusual characteristics of the property and that it satisfies the variance standards. What constitutes unnecessary hardship and substantial justice is a matter to be determined from the facts and circumstances of each application.

Article 5 Section 10-E. 1. of the Unified Development Codes states that the Board of Adjustment may grant a variance if:

- The Applicant demonstrates that the variance shall not be contrary to the public interest;
- Where, owing to special conditions a literal enforcement of the provision of this Chapter will result in unnecessary hardship; and
- The spirit of this Chapter will be observed and substantial justice done.

Article 5 Section 10-E.2. states; no variance shall be granted:

- (a) In order to relieve an owner of restrictive covenants that are recorded in Mobile County Probate Court and applicable to the property;
- (b) Where economic loss is the sole basis for the required variance; or
- (c) Where the variance is otherwise unlawful.

Considerations:

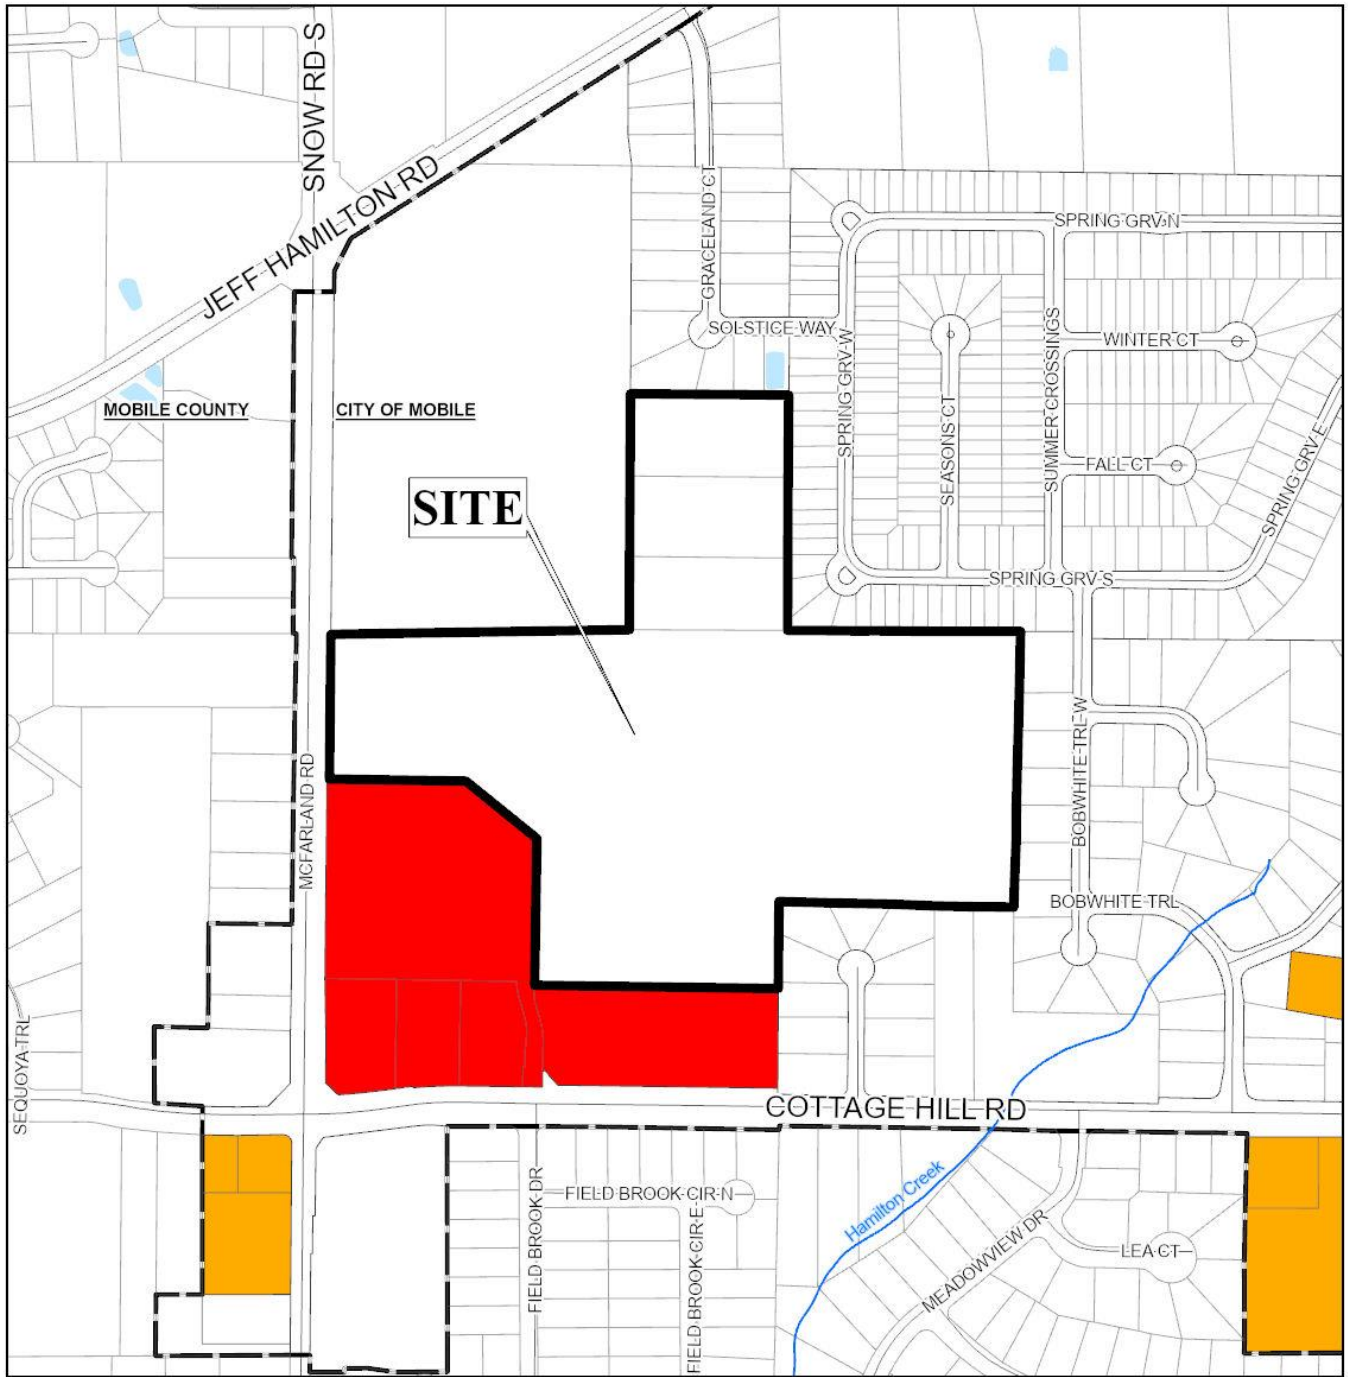

Based on the requested Variance application and documentation submitted if, the Board considers the approval of the request, the following findings of fact must be present:

- A. The variance **will not** be contrary to the public interest;
- B. Special conditions **exist** such that a literal enforcement of the provisions of the chapter **will** result in unnecessary hardship; and
- C. The spirit of the chapter **shall be** observed and substantial justice **done** to the applicant and the surrounding neighborhood by granting the variance.

If the Board is inclined to approve this request, the following condition should apply:

- 1) Full compliance with all other municipal codes and ordinances.

Zoning District Correspondence Matrix

- Directly Related
- Elements of the zoning category are related to the future LU category, but with qualifications (such as a development plan with conditions)
- Land use category is appropriate, but the district does not directly implement the category (e.g., open space in an industrial district)

Residential Land Use

LOW DENSITY RESIDENTIAL (LDR)

This designation applies to existing residential neighborhoods found mostly west of the Beltline or immediately adjacent to the east side of the Beltline.

The primary land use in the LDR districts is residential and the predominant housing type is the single-family housing unit, detached or semi-detached, typically placed within a street grid or a network of meandering suburban streets. The density in these districts ranges between 0 and 6 dwelling units per acre (du/ac).

These neighborhoods may also contain small-scale, low-rise multi-unit structures at appropriate locations, as well as complementary retail, parks and civic institutions such as schools, community centers, neighborhood playgrounds, and churches or other religious uses if those uses are designed and sited in a manner compatible with and connected to the surrounding context. The presence of individual ancillary uses should contribute to the fabric of a complete neighborhood, developed at a walkable, bikeable human scale.
