

Agenda Item # 12

SUB-002962-2024

View additional details on this proposal and all application materials using the following link:

[Applicant Materials for Consideration](#)

DETAILS

Location:

812 Wellington Street

Subdivision Name:

Bryant Addition Subdivision

Applicant:

Ryan Compton, BHL Federal

Property Owner:

Curtis Bryant

Current Zoning:

R-1, Single-Family Residential Urban District

Future Land Use:

Mixed Density Residential

Applicable Codes, Policies, and Plans:

- Unified Development Code
- Subdivision Regulations
- Map for Mobile Comprehensive Plan

Proposal:

- Subdivision approval to create one (1) legal lot of record from one (1) existing metes-and-bounds parcel.

Commission Considerations:

1. Subdivision proposal with nine (9) conditions.

BRYANT ADDITION SUBDIVISION

APPLICATION NUMBER 12 DATE June 20, 2024

SITE HISTORY

The subject site has never been before the Planning Commission or Board of Zoning Adjustment.

STAFF COMMENTS

Engineering Comments:

FINAL PLAT COMMENTS (should be addressed prior to submitting the FINAL PLAT for review):

- A. Provide all of the required information on the SUBDIVISION PLAT (i.e. signature blocks, signatures, certification statements, written legal description, required notes, legend, scale, bearings and distances) that is required by the current Alabama State Board of Licensure for Professional Engineers and Land Surveyors.
- B. Add a graphic scale.
- C. Revise the plat to label each lot with its size in acres and square feet, or the furnishing of a table on the Plat providing the same information.
- D. Add a signature block for the Owner, Notary Public, Planning Commission, Traffic Engineer, and City Engineer.
- E. Add a note to the SUBDIVISION PLAT stating that as shown on the 1984 aerial photo LOT 1 will receive 2,000 sf historical credit of existing (1984) impervious area towards stormwater detention requirement per Mobile City Code, Chapter 17, Storm Water Management and Flood Control).
- F. Add a note that a Land Disturbance permit will be required for any land disturbing activity in accordance with Mobile City Code, Chapter 17, Storm Water Management and Flood Control); the City of Mobile, Alabama Flood Plain Management Plan (1984); and, the Rules For Erosion and Sedimentation Control and Storm Water Runoff Control.
- G. Add a note that the approval of all applicable federal, state, and local agencies (including all storm water runoff, wetland and floodplain requirements) will be required prior to the issuance of a Land Disturbance permit.
- H. Add a note that sidewalk is required to be constructed, and/or repaired, along the frontage of each lot, or parcel, at time of new development or construction, unless a sidewalk waiver is approved.
- I. Add a note that all existing and proposed detention facilities, common areas, and wetlands shall be the responsibility of the Property Owner(s), and not the responsibility of the City of Mobile.
- J. Add a note that all easements shall remain in effect until vacated through the proper Vacation process.
- K. Email a pdf copy of the FINAL SUBDIVISION PLAT and LETTER OF DECISION to the Permitting Engineering Dept. for review at land.disturbance@cityofmobile.org prior to obtaining any signatures. No signatures are required on the drawing.

Traffic Engineering Comments:

Driveway number, size, location, and design to be approved by Traffic Engineering and conform to AASHTO standards.

Urban Forestry Comments:

Property to be developed in compliance with state and local laws that pertain to tree preservation and protection on both city and private properties [Act 929 of the 1961 Regular Session of the Alabama Legislature (Acts 1961, p. 1487), as amended, and City Code Chapters 57 and 65]. Private removal of trees in the right-of-way will require

approval of the Mobile Tree Commission. Removal of heritage trees from undeveloped residential sites, developed residential sites in historic districts, and all commercial sites will require a tree removal permit.

Fire Department Comments:

All projects within the City Limits of Mobile shall comply with the requirements of the City of Mobile Fire Code Ordinance (2021 International Fire Code). Fire apparatus access is required to be within 150' of all non-sprinklered commercial buildings and within 300' of all sprinklered commercial buildings. Fire water supply for all commercial buildings will be required to meet the guidance of Appendices B and C of the 2021 International Fire Code. The minimum requirement for fire hydrants is to be within 400' of non-sprinklered commercial buildings, within 600' of sprinklered commercial buildings, and within 100' of fire department connections (FDC) for both standpipes and sprinkler systems.

Planning Comments:

The purpose of this request is to create one (1) legal lot of record from one (1) existing metes-and-bounds parcel. The site is served by public water and sanitary sewer services.

The preliminary plat does not provide the specifications for Final Plat approval regarding the general form, information to be shown, or attendant items required by Section 5 of the Subdivision Regulations. Such requirements include the items, notes, and certifications that should be placed on a subdivision plat. As such, the Final Plat should provide all the information required by Section 5 of the Subdivision Regulations, along with any additional information required by the Engineering Department.

The proposed lot has frontage on Wellington Street, a minor street with curb and gutter requiring a 50-foot right-of-way. The plat submitted illustrates a substandard 30-foot right-of-way; however, GIS data indicates Wellington Street has an existing right-of-way that may be compliant. If approved, dedication would be required to provide 25 feet from the centerline of Wellington Street, if needed.

If approved, the plat should be revised to illustrate the 5-foot minimum building setback line along Wellington Street as measured from any required dedication. The five-foot setback lines along the side and rear property lines should be removed on the Final Plat, if approved. The lot size is not labeled on the preliminary plat. If approved, the plat should be revised to label the lot with its size in both square feet and acres, after any required dedication, or a table should be furnished on the Final Plat providing the same information.

As proposed, the lot would exceed the depth-to width ratio of Section 6.C.3. of the Subdivision Regulations and would require a waiver of that section, if approved.

SUBDIVISION CONSIDERATIONS

Standards of Review:

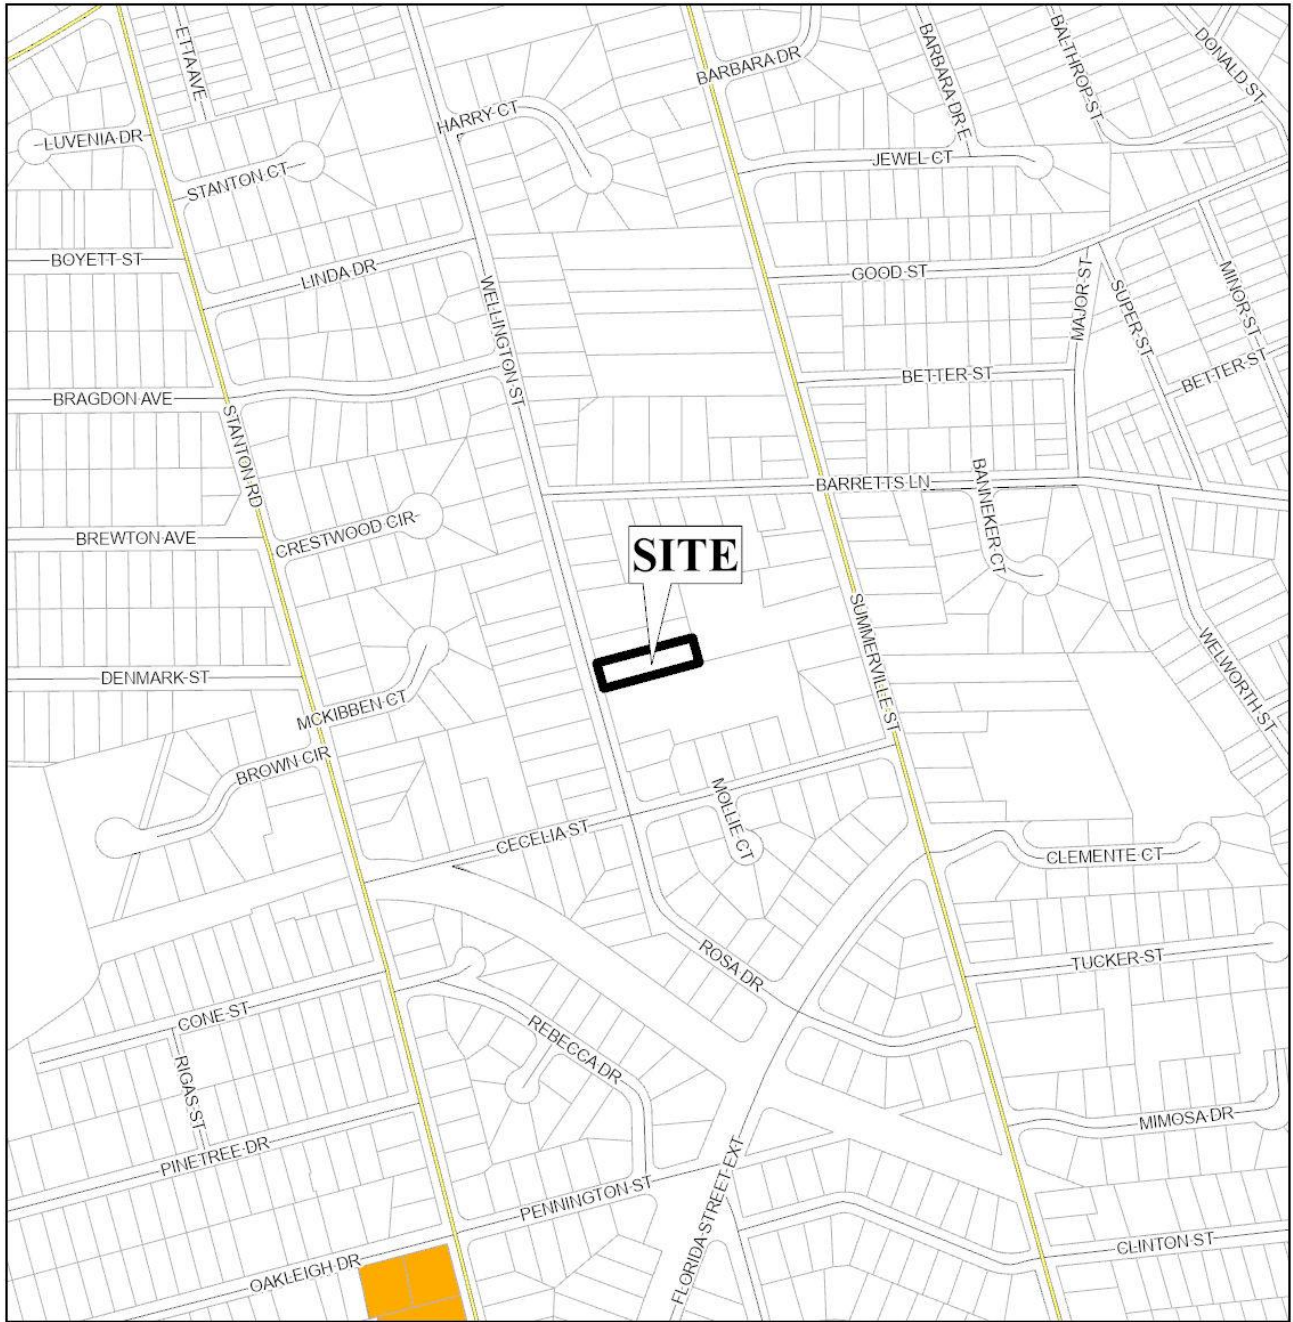

Subdivision review examines the site with regard to promoting orderly development, protecting general health, safety and welfare, and ensuring that development is correlated with adjacent developments and public utilities and services, and to ensure that the subdivision meets the minimum standards set forth in the Subdivision Regulations for lot size, road frontage, lot configuration, etc.

Considerations:

If the Planning Commission considers approving the Subdivision request, and with a waiver of Section 6.C.3. of the Subdivision Regulations, the following conditions could apply:

1. Provision of a subdivision plat in compliance with Section 5 of the Subdivision Regulations;
2. Dedication to provide 25 feet from the centerline of Wellington Street, if needed;
3. Revision of the plat to illustrate the 5-foot minimum building setback line along Wellington Street as measured from any required dedication;
4. Revision of the plat to remove the 5-foot building setback line along the side and rear property lines;
5. Revision of the plat to label the lot with its size in both square feet and acres, after any required dedication, or the furnishing of a table on the Final Plat providing the same information;
6. Compliance with all Engineering comments noted in this staff report;
7. Placement of a note on the Final Plat stating all Traffic Engineering comments noted in this staff report;
8. Compliance with all Urban Forestry comments noted in this staff report; and,
9. Compliance with all Fire Department comments noted in this staff report.

Zoning District Correspondence Matrix

- Directly Related
- Elements of the zoning category are related to the future LU category, but with qualifications (such as a development plan with conditions)
- Land use category is appropriate, but the district does not directly implement the category (e.g., open space in an industrial district)

MIXED DENSITY RESIDENTIAL (MxDR)

This designation applies mostly to residential areas located between Downtown and the Beltline, where the predominant character is that of a traditional neighborhood laid out on an urban street grid.

These residential areas should offer a mix of single family homes, townhouses, 2- to 4- residential unit buildings, accessory dwellings, and low- and mid-rise multifamily apartment buildings. The density varies between 6 and 10 du/ ac, depending on the mix, types, and locations of the housing as specified by zoning.

Like LDR areas, MxDR areas may incorporate compatibly scaled and sited complementary uses such as neighborhood retail and office uses, schools, playgrounds and parks, and churches and other amenities that create a complete neighborhood fabric and provide safe and convenient access to daily necessities.
